

Εκπαιδευτικό Εγχειρίδιο της ΕΑΗΡ για τη χρήση του Εργαλείου Αυτοαξιολόγησης

Πρώτα θα χρειαστεί να δημιουργήσετε έναν λογαριασμό χρήστη

The screenshot shows the top section of the EAHP website. The browser address bar displays '17eahp.edgimo.com'. The EAHP logo is on the left, and a language dropdown menu is set to 'English'. Below the header, there is a green navigation bar with links for 'Home', 'FAQ', and 'EAHP Website'. To the right of these links is a login form with fields for 'Email Address' and a password (represented by dots), followed by a right-pointing arrow button. A 'Lost Password?' link is also visible.

Hospital Self-Assessment Tool

The European Statements of Hospital Pharmacy – Self-assessment

The European Statements of Hospital Pharmacy, adopted through a Delphi process in 2014, express commonly agreed objectives that every European health system should aim for in the delivery of hospital pharmacy services. EAHP is working with its member associations and other stakeholders to bring about the full achievement of the Statements within all its member countries.

The European Association of Hospital Pharmacists (EAHP) has developed an online self-assessment tool to allow hospital pharmacists assess the level of implementation of the Statements within their hospitals.

By assessing their hospital pharmacies, hospital pharmacists will not only be able to understand current position with the implementation of the Statements within their hospitals, but it will also help them understand where they are within their own countries.

The self-assessment tool will also provide an individualised action plan. This action plan will allow further progress with the implementation of individual Statements within hospitals through supporting evidence and other relevant resources.

Η ΕΑΗΡ συστήνει η αξιολόγηση να συμπληρώνεται , εφόσον αυτό είναι εφικτό, με συμμετοχή όλων των εργαζομένων του φαρμακείου.

Η Εφαρμογή επιτρέπει να γίνονται και προσωπικές αξιολογήσεις , τα στοιχεία των οποίων δε συλλέγονται από την ΕΑΗΡ.

Παρακαλούμε να θυμάστε ότι όλα τα δεδομένα καταχωρούνται ανώνυμα.

Η Ενότητα Α βοηθά να περιγραφεί το νοσοκομείο σας με τέτοιο τρόπο ώστε να μπορείτε να συγκρίνετε τα δικά σας αποτελέσματα με αυτά των άλλων νοσοκομείων με παρόμοια χαρακτηριστικά , όταν δημιουργείται η αναφορά των αποτελεσμάτων της αξιολόγησης.

Your Assessments

Section A

Your Hospital

This section will allow comparisons to be made with similar hospitals, provided there are at least 3 in the database

1: What country is your hospital in?

--Select One--

2: Is your hospital?

☐ A general hospital

☐ A teaching hospital (including general care)

☐ A specialist hospital (e.g. children, oncology, mental health)

3: Is your hospital?

☐ A public funded hospital

☐ A private, not-for-profit hospital

☐ Private hospital

4: How many beds are served by your hospital?

☐ Less than 100

Section 2: Selection, Procurement and Distribution

Section 3: Production and Compounding

Section 4: Clinical Pharmacy Services

Section 5: Patient Safety and Quality Assurance

Section 6: Education and Research

Section C (Optional)

Όταν ολοκληρώσετε την Ενότητα Α, μπορείτε να σώσετε και να συνεχίσετε την αξιολόγηση αναφορικά με το επίπεδο εφαρμογής της Ευρωπαϊκής Διακήρυξης για τη Νοσοκομειακή Φαρμακευτική στο φαρμακείο του νοσοκομείου σας.

17eahp.edgimo.com

3: Is your hospital?

- ☐ A public funded hospital
- ☐ A private, not-for-profit hospital
- ☐ Private hospital

4: How many beds are served by your hospital?

- ☐ Less than 100
- ☐ 100 to 250
- ☐ 251 to 500
- ☐ 501 to 1000
- ☐ More than 1000

5: How many pharmacists are employed by your hospital? (full time equivalence)

6: How many pharmacy technicians are employed by your hospital? (full time equivalence)

7: How many other pharmacy support staff, e.g. for logistics, are employed by your hospital? (full time equivalence)

8: How many trainee pharmacists are supported by your hospital? (can be an undergraduate doing 6 months or more of practice training or qualified pharmacists undertaking a recognised pharmacy training)

Your Assessments

Section B

Section 1: Introductory Statements and Governance

1.1

The overarching goal of the hospital pharmacy service is to optimise patient outcomes through working collaboratively within multidisciplinary teams in order to achieve the responsible use of medicines across all settings.

For this statement hospitals should indicated progress on the basis of national standards for hospital pharmacy practice.

☐ N/A

☐ **Not started** - There are multidisciplinary teams but hospital pharmacy is not involved

☐ **Started** - Hospital Pharmacy is involved in at least one multidisciplinary team

☐ **Good progress** - Hospital Pharmacy is involved in more than one multidisciplinary team.

☐ **Excellent progress** - Hospital Pharmacy is involved in many specialites

☒ **Completed** - Hospital Pharmacy is involved in all relevant specialites

[Assessment Questions](#)

Assessment: EAHP Hospital

First Priority (these are the items that are added to the action list based on the score threshold)

[illegible]

Τα άρθρα χωρίζονται σε δυο κατηγορίες ανάλογα με τη βαθμολόγηση:
Πρώτης Προτεραιότητας και Δεύτερης Προτεραιότητας

evaluations where these are available.			
4.6 - Hospital pharmacists, as an integral part of all patient care teams, should ensure that patients and carers are offered information about their clinical management options, and especially about the use of their medicines, in terms they can understand	<input type="radio"/> <input type="radio"/> <input type="radio"/>	<input type="radio"/> <input type="radio"/> <input type="radio"/>	
4.1 - Hospital pharmacists should be involved in all patient care settings to prospectively influence collaborative, multidisciplinary therapeutic decision making; they should play a full part in decision making including advising, implementing and monitoring medication changes in full partnership with patients, carers and other health care professionals	<input type="radio"/> <input type="radio"/> <input type="radio"/>	<input type="radio"/> <input type="radio"/> <input type="radio"/>	
4.4 - All the medicines used by patients should be entered on the patient's medical record and reconciled by the hospital pharmacist on admission. Hospital pharmacists should assess the appropriateness of all patients' medicines, including herbal and dietary supplements.	<input type="radio"/> <input type="radio"/> <input type="radio"/>	<input type="radio"/> <input type="radio"/> <input type="radio"/>	
4.2 - All prescriptions should be reviewed and validated as soon as possible by a hospital pharmacist. Whenever the clinical situation allows, this review should take place prior to the supply and administration of medicines.	<input type="radio"/> <input type="radio"/> <input type="radio"/>	<input type="radio"/> <input type="radio"/> <input type="radio"/>	
2.4 - Procurement should be according to the medicine formulary and informed by the formulary selection process. A robust process should also be in place to appropriately procure medicines not included in the formulary where their use is indicated for the safe and effective care of individual patients	<input type="radio"/> <input type="radio"/> <input type="radio"/>	<input type="radio"/> <input type="radio"/> <input type="radio"/>	
2.5 - Each hospital pharmacy should have contingency plans for shortages of medicines that it procures	<input type="radio"/> <input type="radio"/> <input type="radio"/>	<input type="radio"/> <input type="radio"/> <input type="radio"/>	

Second Priority (these are the items that exceeded the threshold but still scored lower relative to all the questions the user answered)

	<u>Feasibility</u>			<u>Benefit</u>		
Action Items	Low	Medium	High	Low	Medium	High
5.8 - Hospital pharmacists should ensure accurate recording of all allergy and other relevant medicine related information in the patient's health record. This information should be accessible and evaluated prior to prescription and administration of medicines		<input type="radio"/>	<input type="radio"/>		<input type="radio"/>	<input type="radio"/>
5.7 - Hospital pharmacists should ensure that the medicines administration process is designed such that transcription steps between the original prescription and the medicines administration record are eliminated		<input type="radio"/>	<input type="radio"/>		<input type="radio"/>	<input type="radio"/>
5.5 - Hospital pharmacists should help to decrease the risk of medication errors by disseminating evidence- based approaches to error reduction including computerised decision support.		<input type="radio"/>	<input type="radio"/>		<input type="radio"/>	<input type="radio"/>
5.4 - Hospital pharmacists should ensure the reporting of adverse drug reactions and medication errors to regional or		<input type="radio"/>	<input type="radio"/>		<input type="radio"/>	<input type="radio"/>

Αν αξιολογήσετε ένα άρθρο ως Χαμηλής Εφαρμοσιμότητας και Χαμηλού Οφέλους, αυτό το άρθρο δε θα ενσωματωθεί στο τελικό Πλάνο Δράσης.

Statement 4.6

Section 4

"Hospital pharmacists, as an integral part of all patient care teams, should ensure that patients and carers are offered information about their clinical management options, and especially about the use of their medicines, in terms they can understand."

What does it mean for patients? When a patient is transferred between healthcare settings there is a risk of error due to lost information in the process, as highlighted in scientific literature. Patients can expect hospital pharmacists to transfer information about their medication whenever they are moved to another healthcare setting, to provide safe and optimal continuation of treatment.

What does it mean for healthcare professionals? Complex medication treatments need clear information transfer which should be provided by using the comprehensive knowledge and understanding of medicines of hospital pharmacists

What does it mean for Hospital Pharmacists? Hospital pharmacists should contribute to transfer all medication information whenever patients are moved in another sector of care including different units of the hospital. Hospital pharmacists should attempt to resolve any medication related issues and use a pharmacy information record to communicate this information. If not established hospital pharmacists should establish this record

My Assessment

Summary **My Assessment** Action Plan Comparative Report Assessment Questions

Completed: October 17, 2017

Assessment: EAHP Hospital

Export to PDF

1.1 -
The overarching goal of the hospital pharmacy service is to optimise patient outcomes through working collaboratively within multidisciplinary teams in order to achieve the responsible use of medicines across all settings.

For this statement hospitals should indicated progress on the basis of national standards for hospital pharmacy practice.

Completed - Hospital Pharmacy is involved in all relevant specialites

1.2 - At a European level, 'Good Hospital Pharmacy Practice' guidelines based on the best available evidence should be developed and implemented. These guidelines will include corresponding human resources and training requirements and assist national efforts to define recognised standards across the scope and levels of hospital pharmacy services

Μην ξεχνάτε ότι μπορείτε να εξαγάγετε το Πλάνο Δράσης και όλες τις απαντήσεις σας και ως αρχείο PDF...με τον τρόπο αυτό μπορείτε να μοιράζεστε τα αποτελέσματα με τους συναδέλφους σας.

The screenshot displays the EAHP (European Association of Hospital Pharmacists) website interface. The browser address bar shows '17eahp.edgimo.com'. The EAHP logo is in the top left, and a language dropdown is set to 'English'. A navigation bar includes links for Home, FAQ, and EAHP Website, with a 'Welcome, EAHP TUTORIAL' message on the right. The main heading is 'Assessment Action Plan'. Below it, a tabbed menu shows 'Summary', 'My Assessment', 'Action Plan' (selected), 'Comparative Report', and 'Assessment Questions'. The content area states the assessment was completed on October 17, 2017, for 'EAHP Hospital'. It provides a brief explanation of the customized action plan and lists two first priority items. A blue arrow points from the introductory text to the 'Export to PDF' button. A sidebar on the right encourages collaboration with a 'Let's Collaborate!' section.

Assessment Action Plan

Summary My Assessment **Action Plan** Comparative Report Assessment Questions

Completed: October 17, 2017

Assessment: EAHP Hospital

Below is your customized action plan. Based on the answers you provided regarding impact and feasibility, we ranked identified up to 20 items on which you should focus your efforts. Those items are listed below from highest to lowest priority. Action items with a low ranking for both feasibility and benefit have been removed from your Action Plan. You can always re-prioritize your action plan by using the link below.

[Export to PDF](#) [Re-prioritize](#)

First Priority Action Plan

- 4.6 - Hospital pharmacists, as an integral part of all patient care teams, should ensure that patients and carers are offered information about their clinical management options, and especially about the use of their medicines, in terms they can understand
<http://statements.eahp.eu/statements/statement-46>
- 4.4 - All the medicines used by patients should be entered on the patient's medical record and reconciled by the hospital pharmacist on admission. Hospital pharmacists should assess the appropriateness of all

Η ΕΑΗΡ συνιστά να πραγματοποιείτε την αξιολόγηση τουλάχιστον κάθε 6 μήνες, επαναξιολογώντας την εφαρμογή των άρθρων της Διακήρυξης στο φαρμακείο σας.

Μπορείτε να επικαιροποιείτε την αξιολόγηση όσες φορές θέλετε πατώντας «Επικαιροποίηση». Η ΕΑΗΡ θα παραλάβει τότε τα επικαιροποιημένα δεδομένα αυτόματα.

The screenshot shows the EAHPharm website interface. At the top, the browser address bar displays 'sat.eahp.eu'. The EAHPharm logo is on the left, and a language dropdown menu is set to 'English'. A navigation bar contains links for 'Home', 'FAQ', 'EAHP Website', and 'Administration Tool', along with a 'Logout' link and a welcome message for 'Gonzalo Marzal Lopez'.

Your Assessments

The European Statements of Hospital Pharmacy Assessment Tool uses multiple-choice questions to identify policies, procedures, and services that should be implemented. After answering the questions, you will have a chance to prioritize the actions recommended to improve your practice. A complete list of assessment questions and available resources are provided as PDFs. Review of these documents in advance may ease your completion of the assessment.

The average time to complete the assessment is 30 min. Please keep in mind that you can stop the assessment at any time and finish it later on as the progress is saved. EAHP encourages Chief Hospital Pharmacists and/or the person in charge of doing the official assessment to go through the assessment with the whole pharmacy team.

Your Assessments

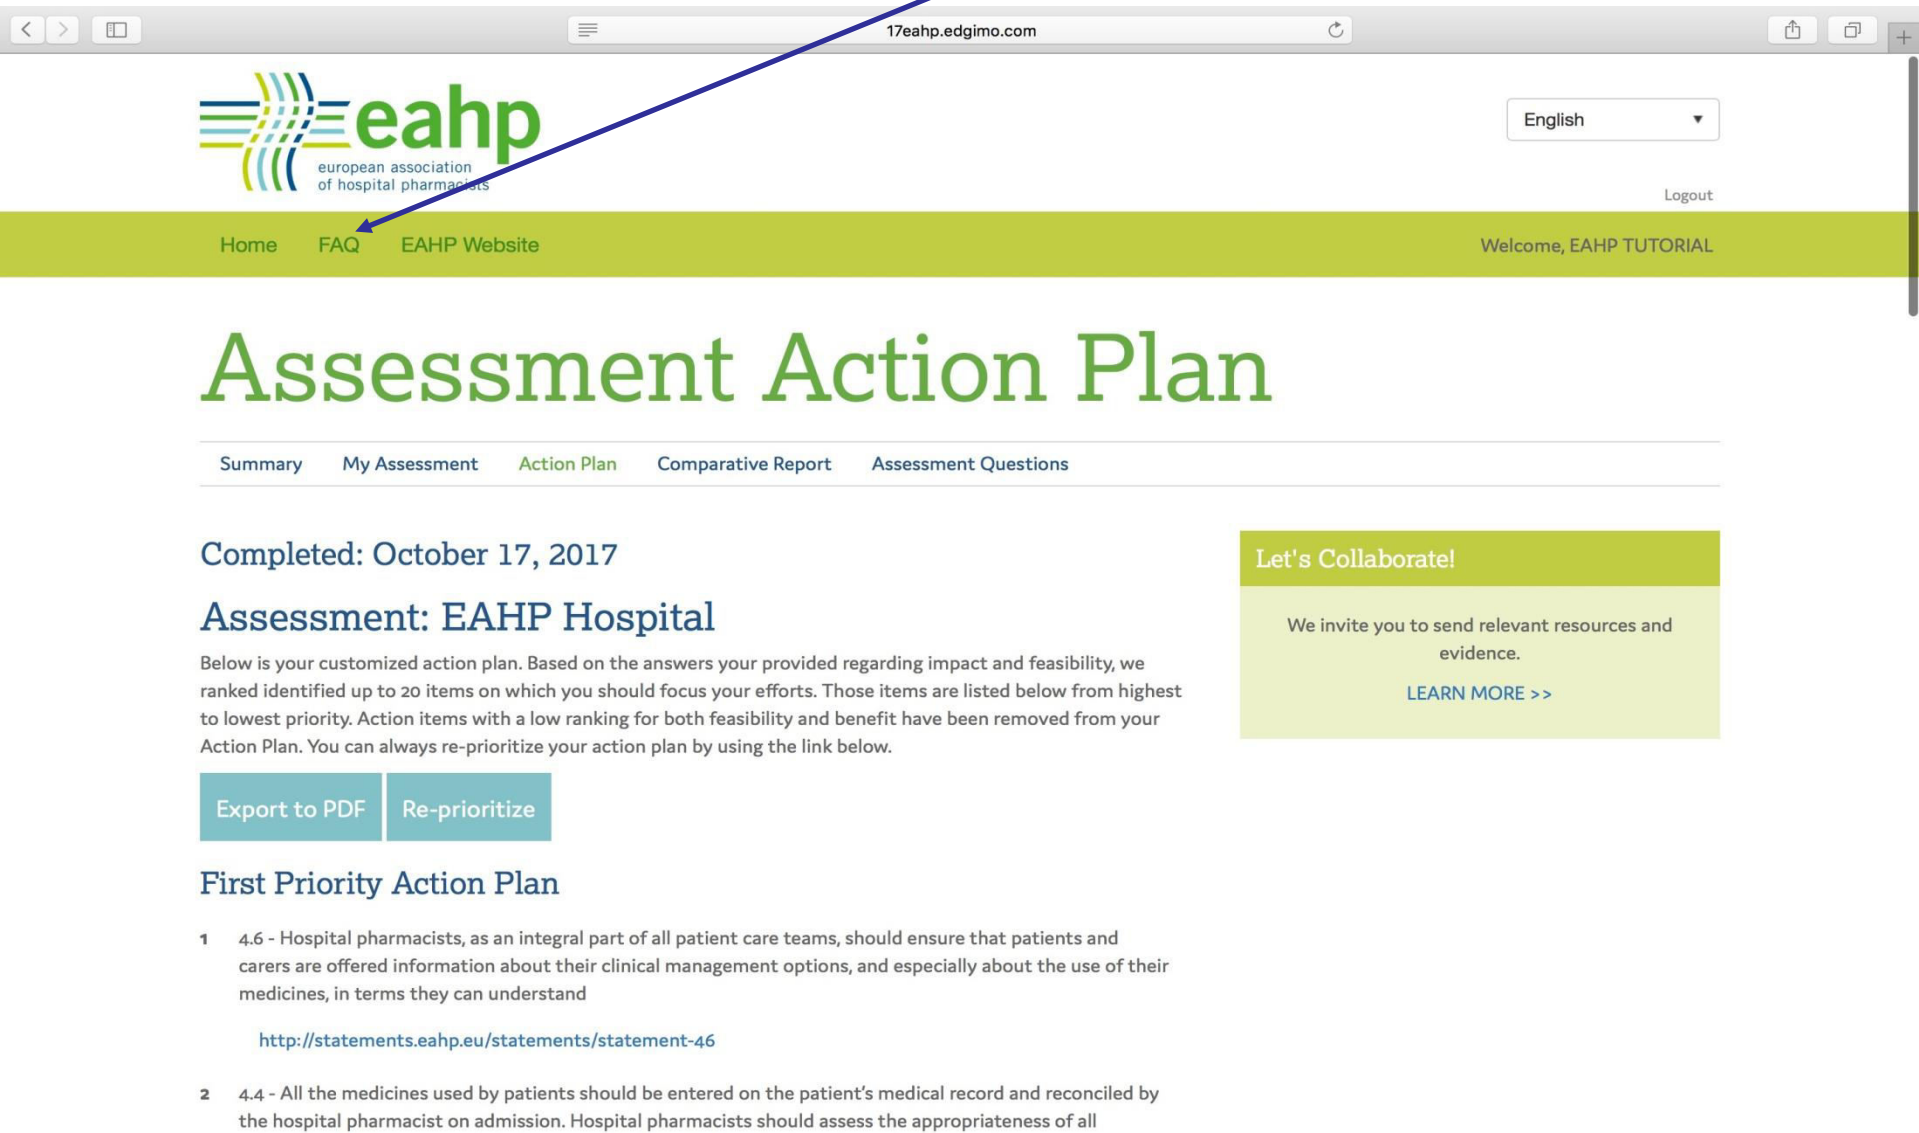

Your completed and pending assessments are below. You have the ability to revise completed assessments over time.

The screenshot shows the EAHP (European Association of Hospital Pharmacists) website. The browser address bar displays "17eahp.edgimo.com". The EAHP logo is in the top left, and a language dropdown menu is set to "English". The navigation bar includes links for Home, FAQ, and EAHP Website. The main heading is "Assessment Action Plan". Below this, a sub-navigation bar highlights "Action Plan" among other options like Summary, My Assessment, Comparative Report, and Assessment Questions. The content area states the plan was completed on October 17, 2017, for an "EAHP Hospital" assessment. It provides a brief explanation of the customized action plan and offers buttons to "Export to PDF" and "Re-prioritize". A "First Priority Action Plan" section lists two items: 1. Hospital pharmacists should ensure patients and carers are informed about clinical management options and medicine use. 2. All medicines used by patients should be entered on the medical record and reconciled by the hospital pharmacist. A "Let's Collaborate!" sidebar invites users to send resources and evidence, with a "LEARN MORE >>" link.
