

STATEMENT IMPLEMENTATION NEWSLETTER #3

MARCH 2017

Statement Implementation website

EAHP is updating its website to include a dedicated section related to the Statement implementation project. This section will provide an overview of why the Statements are so important to a variety of stakeholders, ranging from patients and policy makers through to other healthcare practitioners, as well as our many partners in industry and academia.

The website will also provide a range of resources to help with the implementation of the Statements within individual hospitals or at the regional and national levels. These resources will include an evidence base for each of the Statements in addition to general material designed to assist our member associations with implementation.

The website will be launched during the 22nd Congress in Cannes, France (22-24 March 2017)!

22nd Congress in Cannes

We are approaching the EAHP 22nd Congress in Cannes (22-24 March) with the theme “Hospital Pharmacists-Catalysts for Change”. During the Congress, EAHP will present the Statement implementation project and will launch an updated website. We will also have a demo version of the self-assessment tool ready to test.

Moving from Statement to Implementation

The EAHP Implementation team updated the EAHP board and the Steering Implementation committee about the progress made with the project. The Steering committee was delighted with the progress made and happy to see that all their recommendations were taken into account. We want to thank all member associations and all national implementation ambassadors for their great job during the project. By working together, we will move from Statement to implementation within all our member countries.

If you want to help your country to move towards Statement implementation or you want to learn more about the project, please contact us at: Statements@eah.eu
